LAST THREE MONTHS

There is generally one release per month. Urgent bugs can be fixed with an emergency point release. There is no scheduled release during December.

Some operations work is not included in the GitHub issue summary.

Issues Closed	
Major enhancement	4
Other enhancements	6

Bugs	12
Total	22

RELEASE OVERVIEW

Next Release (January, 2.75.0)

#1822	Major enhancement Integration Testing with Live Elasticsearch	Improve our testing process, leading to improved search and discovery
#1821	Noteworthy minor enhancement Remove default country setting from "Add Exchange" form	Users will have to select a country for a new IX instead of changing the default country to fit
#1846	Noteworthy bug fix Page load time dramatically goes up when limiting queries	Logging slow queries to identify the issues related to this bug

Schedule for major issues

Month, version	Major feature	Narrative
December	NO RELEASE	
January, 2.75.0	Investigate performance tuning opportunities	Part of a set of issues to improve the performance of our current architecture and investigate new design options.
February, 2.76.0	Follow-on from January's performance issue: possibly a design change	Issue not decided yet
March, 2.77.0	Issue not decided yet	

Main agenda

- Tutorial web server:
 - This exists as an educational resource. But should we seek to adjust the web UI so we don't need to teach people how to use it?
 - Logs show 29 users in the last 90 days, including at least one user from 20C.
 - 1 net object was created in the last 30 days.

- MFA requirement and shared accounts: alternative approaches to getting many colleagues access to PeeringDB. Should we blog about options for handling this?
Leo Vegoda
- New idea: adding support for internal facility codes. The idea is to let organizations with internal codes for data centres upload them and their relationship to PeeringDB's facility IDs. Then, they could see their internal IDs in relevant searches. If we did this, we'd probably want to limit their visibility in web/API output to members of the organization that uploaded them.
Leo Vegoda

Number	Title	Summary	Consent Finalized?
#1865	Anycast PeeringDB with nodes closer to users	A potential approach for lowering latency and improving resilience by running road-only instances in three locations around the world.	
#126	Give peeringdb-py a web interface	A potential approach for lowering latency and improving resilience by making it very easy for users to run a local web interface to peeringdb-py.	
#1600	RFE for IRRdb support on Route Servers	<p>Networks who peer at many IXPs would value the configuration convenience of knowing which IRRs each IXP's Route Servers support in a single query to PeeringDB over the manual effort of reviewing websites and PeeringDB notes.</p> <p>The request is for a single field with a comma separated list of IRRdbs.</p>	
peeringdb-py #71	Inconsistencies between Client and API	Is this intended behaviour or a bug?	
#1810	Allow disabling either passwords or TOTP for users with passkeys	As title	

Consent Agenda

Non-contentious issues that can be agreed in a single vote. Members can ask for an issue to be placed on the main agenda if they want it to have more discussion.

Number	Title	Summary	Consent Finalized?
<u>#1870</u>	Ctl/local/setup.sh: input data doesn't fit schema limits	Some file names for logos are too big	
peeringd b-py <u>#129</u>	auto_pdb_load_data.sh fails with MySQL Error Data too long for column 'logo'	As title	
<u>#1862</u>	Consider new language for when: Cannot upload .png logo	Request for better webUI tooltip guidance on supported files for logos	
peeringd b-py <u>#128</u>	django-countries dependency missing	As title	

Informational

No action required. Members should be aware that these new issues have been agreed since the last meeting.
